## **ADDITIONAL NEEDS TRAFFIC LIGHT SYSTEM**

### **What is it?**

Here at Driver and Durack OSHC we understand that we cater for and support many families of children with additional needs and or sensory processing needs. We acknowledge that many of these can vary from child to child, some are diagnosed and others are not, this may also include anxiety.

To help families in deciding what activities are suitable for each individual child and their needs we have created the Traffic Light System.

The Traffic Light System is exactly as it sounds, a variation of colored dots indicating what level of sensory difficulties that may be encountered in each programmed activity.

**RED** - indicating that throughout the activity a large amount of sensory difficulties may be encountered. Some examples are: large confined groups of children, excessive noise, bright lights or an exposure to particular activities or resources that may impact a child's ability to participate, such as balloons etc.

**ORANGE** - indicating that there is a medium level of sensory difficulties that may be encountered, parents may decide at their own discretion upon consultation with the coordinator, if their child will be able to participate comfortably

**GREEN** - indicating that this activity will be a wonderful opportunity for your child to participate comfortably.

## **ANAPHYLAXIS POLICY**

Parents and/or carers of a child/children diagnosed with anaphylaxis please note:

- It is conditional of your application for enrolment into the Vacation Care Program that you agree to your child/children's anaphylaxis action plan being displayed in the main room of the venue they are attending. This is to ensure the safest possible environment for the child, and that relevant information is readily available to the community at all times.
- All parents are to be aware that children with anaphylaxis will be attending Vacation Care Program. When providing food for your child/children please do not send food containing specified allergens or ingredients as identified on the child/children's displayed Action Plans.
- Please note: A risk minimisation plan is required to be developed for all children who have been diagnosed with anaphylaxis, asthma, diabetes or any other medical condition in consultation with educators on enrolment.
